

Who Was Charlotte?

Charlotte was diagnosed with stage IV neuroblastoma at the age of two. She endured aggressive treatments for two and a half years by holding the hands of her parents, brothers, family and friends, as she underwent chemotherapy, surgeries, tandem stem-cell transplants, radiation and anti-body treatments. Charlotte was brave and stoic through her darkest days and courageously fought until her little body could take no more. Who was Charlotte? Five-year old Charlotte was the color orange, LEGO creations, babies, birthdays, and swings. She was singing chipmunks, markers and stickers, ballet slippers, and books. Describing her short life is best framed in the phrase "Faith, Hope and Love" but as it is said, the greatest of these is Love. Charlotte Rose Kelly was Love.
