

About Neuroblastoma

Neuroblastoma is an aggressive form of cancer associated with the nerve cells and adrenal glands. It commonly occurs in infants and very young children. Its cause is unknown. Only 650 new cases are reported in the United States annually. Neuroblastoma therefore is regarded as an orphan disease, one that does not attract funding. As such, it is left largely to the families of neuroblastoma patients to raise the necessary funds to further research to find a cure.

Tenth And Final Run for Charlotte

Since 2011, *Prayers for Charlotte* has helped well over 200 families with the financial hardship that comes with diagnosis. An additional \$175,000 has been gifted to research and family support organizations. Our work is not done. On April 26, 2020, we will meet again at the starting line to continue the race against cancer. We hope you will join us to support this year's event, to give help and hope to families fighting pediatric cancer.

Registration Information

Who Was Charlotte?

Charlotte was diagnosed with stage IV neuroblastoma at the age of two. She endured aggressive treatments for two and a half years by holding the hands of her parents, brothers, family and friends, as she underwent chemotherapy, surgeries, tandem stem-cell transplants, radiation and anti-body treatments. Charlotte was brave and stoic through her darkest days and courageously fought until her little body could take no more. Who was Charlotte? Five-year old Charlotte was the color orange, LEGO creations, babies, birthdays, and swings. She was singing chipmunks, markers and stickers, ballet slippers, and books. Describing her short life is best framed in the phrase "Faith, Hope and Love" but as it is said, the greatest of these is Love. Charlotte Rose Kelly was Love.
